Monday Basics – Training & Coffee

Monday Basics: Training & Coffee - A Space to Share Knowledge and Grow Together

Monday Basics: Training & Coffee is a transversal training initiative designed to create an **open and collaborative learning community**. Inspired by informal conversations among the **Research Support Staff (PSR) of the Department of Chemical Engineering**, this project aims to leverage collective knowledge to generate synergies and foster an academic and professional support network.

On the **last Monday of each month**, **Monday Basics** sessions provide an informal space where **PDI, PTGAS, and students** can share experiences and acquire new skills in a relaxed environment. Unlike traditional training programs, this initiative embraces a **dynamic and participatory model**, where everyone has the opportunity to both learn and teach, regardless of their role within the university.

In addition to facilitating **continuous learning**, **Monday Basics** breaks down barriers between different university groups and promotes a culture of **collaboration and teamwork**.

More than just a training session, it is an opportunity to connect, exchange ideas, and grow together. Come share knowledge... and a coffee! ☕

► **When:** The last Monday of each month

► **Time:** 9:30 to 10:30

► **Duration:** 1 hour

► **Language:** The presenter decides the language of the session.
